DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: The specification does not have proper headings, as shown below.

Appropriate correction is required.

3. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
 1. Field of the Invention.
 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.

Art Unit: 3721

- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (I) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite since “the rear” on line 3, “the front” on line 4, and “the abutment surface” on line 6 lacks proper antecedent basis. On line 6, the recitation of “it” is indefinite.

What does this refer to? Claim 3 is indefinite since “its ends” on line 2 lacks proper antecedent basis. Perhaps claim 6 should depend from claim 2 in order to provide antecedent basis for the driving means recited on line 2. In claim 6, line 2, “the front” lacks proper antecedent basis.

Claim 7 is indefinite since “the rear and “the front” on line 2 lacks proper antecedent basis. The recitation of “is removed from abutment” on the last line is awkward, and appears to be incomplete. “Abutment” with what?

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nikolich.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Robinson, Howard et al., Shkolnikov et al., Ishizawa et al, and Dohi et al. disclose similar tools.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Smith whose telephone number is (703) 308-2190.
